Sound Masking Solutions
for Educational Institutions

Protect Student Speech Privacy • Reduce Campus Noise Distractions

Protect Student Privacy

Protecting your students' privacy isn't just an add-on – it's the law. The Family Educational Rights and Privacy Act (FERPA) mandates that post-secondary institutions take all reasonable efforts to safeguard student information including how the information is collected, stored, used, and released. Many institutions have established effective security measures to protect the data stored on their servers, but overlook the need to safeguard client information during its collection and use. Sound Masking solutions help protect speech privacy by making it more difficult to overhear people speaking.

Reduce Noise Distractions

In addition to providing a more secure and private environment for your students, sound masking can also help reduce distractions. Adding sound masking to your libraries, student centers, classrooms, and other study spaces will ensure minimal disruptions to students while they are studying or taking tests.

Campus Locations that Benefit from Sound Masking:

- Dean of students office
- Financial aid office
- Campus bank
- Health center
- Student counseling center

- Dorm corridors
- Admissions department
- Career development office
- Campus safety
- Registrar's office

- Professor's offices
- Residential life office
- Study halls
- Computer rooms

What is Sound Masking?

Sound masking is the addition of an unobtrusive background sound to an environment, similar to airflow, that reduces the intelligibility of human speech and decreases distractions. The resulting environment is more productive, private, and comfortable.

The QtPro™ Sound Masking System from Cambridge Sound Management

The patented QtPro system is a cost-effective solution to protect speech privacy and reduce distractions. Barely visible emitters disperse the pre-programmed sound masking over a desired area. The emitters are controlled by intuitive Qt100, Qt300, or Qt600 control modules (depending on the size of the space being sound masked) that can be wall or rack mounted.

Reliable QtPro systems are deployed in hundreds of millions of square feet and are trusted by over 40% of the Fortune 100. They consume less than 27 watts of power per 72,000 square feet of space, are GreenSpec listed, and can contribute to LEED Certifications.

Educational institutions that use QtPro:

Canyons School District	Northeastern University	University of Georgia
Carbon School District	Northern Arizona University	University of Iowa
Central Michigan University	Penn State University	University of Maryland
City University of New York	Phillips Exeter Academy	University of Missouri
Florida Gulf Coast University	Pierce College	University of Texas
Florida State College at Jacksonville	Purdue University	University of Virginia
Georgia Southern University	Radford University	University of Western Ontario
Huston-Tillotson University	Santa Fe College	Vanderbilt University
Ithaca College	Stanford University	Virginia Commonwealth University
Massachusetts Institute of Technology	University of Arkansas	Wake Forest University
Michigan State University	University of Buffalo	
New York University	University of California	Many More…
North Carolina State University	University of Florida	

Sound Masking is less expensive than you think.
